HEARING RESEARCH

Contents of Volume 101

Research Papers

M.G. Evans, J. Kiln and D. Pinch (UK)
No evidence for functional GABA receptors in outer hair cells isolated from the apical half of the guinea-pig cochlea 1

M. Pierson and D. Li (USA)
Cochlear integrity in rats with experimentally induced audiogenic seizure susceptibility 7

W.J. Clerici and L. Yang (USA)
Direct effects of intraperilymphatic reactive oxygen species generation on cochlear function 14

N.G. Bibikov and S.V. Nizamov (Russia)
Temporal coding of low-frequency amplitude modulation in the torus semicircularis of the grass frog 23

J.O. Pickles, D.A. Billieux-Hawkins and G.W. Rouse (Australia)
The incorporation and turnover of radiolabelled amino acids in developing stereocilia of the chick cochlea 45

J.J. Crouch and B.A. Schulte (USA)
Identification and cloning of site C splice variants of plasma membrane Ca-ATPase in the gerbil cochlea 55

C. Pantev, L.E. Roberts, T. Elbert, B. Roß and C. Wienbruch (Germany, Canada)
Tonotopic organization of the sources of human auditory steady-state responses 62

T. Kimitsuki, T. Nakagawa, K. Hisashi, S. Komune and S. Komiyama (Japan)
Gadolinium blocks mechano-electric transducer current in chick cochlear hair cells 75

Y. Cazals and Z.W. Huang (France, People's Republic of China)
Average spectrum of cochlear activity: a possible synchronized firing, its olivo-cochlear feedback and alterations under anesthesia 81

M. Eybalin, M.D. Norenberg and N. Renard (France, USA)
Glutamine synthetase and glutamate metabolism in the guinea pig cochlea 93

P. van Dijk, P.M. Narins and J. Wang (The Netherlands, USA)
Spontaneous otoacoustic emissions in seven frog species 102

L.J. Hood, C.I. Berlin, A. Hurley, R.P. Cecola and B. Bell (USA)
Contralateral suppression of transient-evoked otoacoustic emissions in humans: intensity effects 113

T. Matsunaga, J. Kanzaki and Y. Hosoda (Japan)
The vasculature of the peripheral portion of the human eighth cranial nerve 119

A.P. Nenov, C. Norris and R.P. Bobbin (USA)
Acetylcholine response in guinea pig outer hair cells. I. Properties of the response 132

A.P. Nenov, C. Norris and R.P. Bobbin (USA)
Acetylcholine response in guinea pig outer hair cells. II. Activation of a small conductance Ca^{2+}-activated K^+ channel 149

K. Yamada, K. Kaga, A. Uno, M. Shindo (Japan)
Sound lateralization in patients with lesions including the auditory cortex: comparison of interaural time difference (ITD) discrimination and interaural intensity difference (IID) discrimination 173

Short Communication

S. Takeuchi, A. Kakigi, T. Takeda, H. Saito and A. Irimajiri (Japan)
Intravascularly applied K^+-channel blockers suppress differently the positive endocochlear potential maintained by vascular perfusion 181

Erratum

X. Zhou, W.A. Hossain, A. Rutledge, C. Baier and D.K. Morest (USA)
Erratum to "Basic fibroblast growth factor (FGF-2) affects development of acoustico-vestibular neurons in the chick embryo brain in vitro" [Hearing Res. 93 (1996) 147–166] 186
